

Verification

This is to verify that the below mentioned products manufactured by **SK Tuote Oy** have VTT:s external quality control according to the quality control contracts between the manufacturer and VTT, No 11/96/RTE5.

Quality control concern the following SK Fastening fasteners of polypropylene plastics

CROCO A-110 and B110 fasteners

CROCO-308 fasteners

CROCO-512 fasteners

BIG-110 fasteners

BIG-308 fasteners

VIKI-fasteners

LSK- washers

Y40-PP washers

and the following fastening types of glass fibre reinforced PA-6 polyamide

POWER-fasteners

RKL- fasteners

NV –distance pieces

Y40-PA washers

The external quality control includes type tests every five year and control visit every year. The external control visit includes examination of the production- and quality control manuals, manufacturing area and machines, used raw materials and manufacturing methods. Samples taken during the visits are tested according to the methods defined in the quality control contract.

Inquiries concerning the validity of the contract can be addressed to VTT.
