

RESEARCH AND DEVELOPMENT WITH VILPE Oy

Every year, the product development team of VILPE Oy creates multiple new innovations to meet the needs of the ventilation and roof market. As pioneers on the market, we continually invest in talented people and new technical solutions to produce even higher quality products that cater to our customer's needs. VILPE Oy product development creates 4-6 new innovations per year, many of them together with partners.

Our product development process is characterized by:

- A smooth path from the first idea to production of the new innovation.
- Combining the latest technology with what is known to be good practice within the ventilation and construction industry.
- 10% of our annual turnover is invested in R&D.
- Fast and responsive 3D-modeling prototypes with our 3D-printer.
- All products are carefully tested in our research laboratory.

OUR PURPOSE

is to bring better indoor air, energy efficiency and longevity of structures to all spaces. We believe an easier life is a better life. No matter if you are at home or at work, you deserve to rest assured that the air you breathe is good for you. We constantly launch innovative ventilation and fastening solutions for construction that reduce health risks and prolong the overall lifespan of buildings.

OUR VISION

is to achieve a sustainable growth rate through new customer driven solutions that help us fulfill our purpose. We want to achieve growth by offering new innovations to installers and end consumers and by reaching new markets.

OUR STRATEGY

is to fulfill our purpose now and in the future by investing in our partners, organisation and new innovations. As a partner, we are reliable, stable and determined. In order to offer the best possible solutions to customers, we constantly strive to develop new ways to communicate, involve our partners and foster a close relationship with them.

OUR MISSION

is solving the needs of modern construction through new innovations. This motivates us in our everyday work and makes the pioneering spirit of VILPE Oy.
