

# VILPE<sup>®</sup> Desktop CO<sub>2</sub> Monitor

for measuring the CO<sub>2</sub> concentration of indoor air

VILPE Desktop CO<sub>2</sub> Monitor is a smart, compact and easy-to-use mini desktop unit for measuring the carbon dioxide concentration of indoor air. The Monitor also measures the ambient temperature.

The VILPE CO<sub>2</sub> Monitor can be widely used in the offices, schools, meeting rooms, homes and other places where personal comfort and health are important.

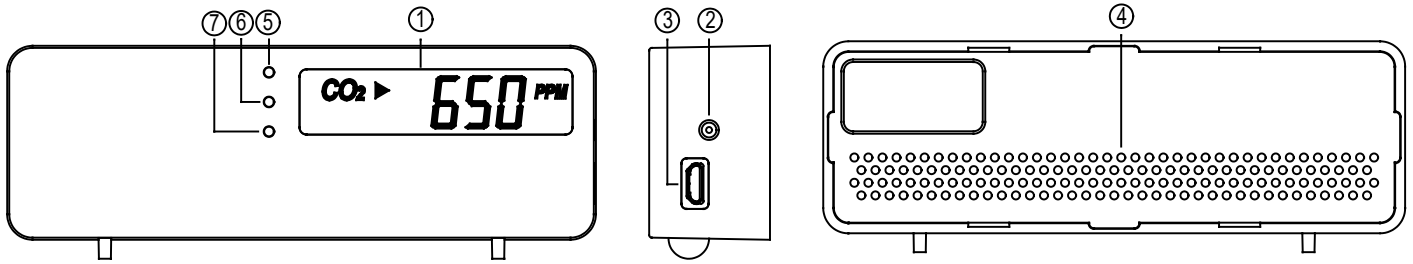

Features:

- Three different LED displays show the current indoor air quality
- It uses dual beam NDIR technology to improve the longterm stability
- Small and compact. Obtained data can be stored on a computer
